SUMMARY INFORMATION

FUNDSTRAT GRANNY SHOTS US LARGE CAP ETF - FUND SUMMARY

Investment Objective

The Fundstrat Granny Shots US Large Cap ETF (the “Fund”) seeks long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses¹ (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.75%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.75%

¹ The Fund’s adviser will pay, or require a sub-adviser to pay, all of the Fund’s expenses, except for the following: advisory fees and sub-advisory fees, interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the “1940 Act”), and litigation expenses, and other non-routine or extraordinary expenses.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$77	\$240	\$417	\$930

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. For the fiscal period ended October 31, 2025, the Fund’s portfolio turnover rate was 51% of the average value of its portfolio.

Principal Investment Strategies

The Fund, an actively-managed exchange-traded fund (“ETF”), seeks to achieve its investment objective by investing in U.S. large capitalization equity securities. The term “granny shot” is a basketball term that refers to an older, unconventional manner of shooting free throws. For the Fund, this term refers to the unique proprietary research process of Fundstrat Capital, LLC (the “Sub-Adviser”). The Sub-Adviser uses this process to select a portfolio of stocks that match certain themes that, in the Sub-Adviser’s assessment, have the potential to fundamentally impact the U.S. economy and stock market. The Sub-Adviser’s investment process is designed to include top-down fundamental analyses, including qualitative assessments of thematic relevance and correlation analysis, followed by a quantitative screening process, as discussed in further detail below.

The Sub-Adviser begins its portfolio construction process by analyzing certain broad research areas, including macro-economics, monetary policy, demographics, behavioral trends, industrial and technology trends, and the business cycle. Through this analysis, the Sub-Adviser seeks to identify themes within each research area that it believes will fundamentally impact the U.S. economy and stock market going forward. Factors considered when determining whether a theme should be incorporated into the investment process include the significance of the theme to the overall economy and equity markets, the probability of the theme materializing, the cross-impact of the theme with other themes, whether the market has already recognized the potential impact of the theme, and the feasibility of investing in the theme.

For example, the rising influence of the millennial generation could be identified and substantiated as one theme (i.e., an investible opportunity) within the larger demographics research area. In this case, the Fund may include target sectors in its process which historically exhibit sensitivity to changes in macroeconomic readings, such as the personal consumption expenditures index. These sectors may include technology, digital services, e-commerce, social media, fintech, and streaming platforms, which align with the millennial generation's digital-first lifestyle. Additionally, industries focused on health and wellness, sustainable products, and experiences over goods may be likely to benefit from this generation's values and consumption patterns.

Once a theme is identified, the Sub-Adviser conducts a top-down fundamental analysis of U.S. companies with a market capitalization of over \$10 billion. This analysis involves both qualitative and quantitative assessments aimed at identifying sectors and sub-sectors, and ultimately individual companies, within the investment universe that it believes will most benefit from the identified theme.

The Sub-Adviser employs distinct approaches when conducting this top-down process. These include correlation analysis of stock price movements, revenues, and capex (capital expenditures) with the corresponding theme, as well as qualitative assessments of a company's business focus and strategic alignment with the theme.

Additionally, the Sub-Adviser uses a keyword frequency analysis to identify theme-related terms in transcripts from company earnings calls, investor meetings, and other corporate communications. This transcript analysis helps gauge a company's alignment with the theme based on how often executives discuss it in strategic discussions.

For example, if the investment theme focuses on the millennial generation, the Sub-Adviser might search for terms like "millennial," "Gen Y," "digital engagement," or "sustainability." The frequency of such terms helps assess the company's strategic focus and relevance to the theme, which is then evaluated qualitatively to determine whether the company's engagement with the theme is substantive. The companies remaining after this top-down analysis make up the pool from which Fund portfolio holdings will be selected and the Sub-Adviser consistently monitors the pool of stocks that represent the investible theme.

Themes will change over time as the Sub-Adviser's analysis changes. For example, the Sub-Adviser may determine that a specific theme, once a central focus of the Fund's portfolio construction, no longer offers the best investment opportunities based on evolving qualitative assessments and quantitative data. Themes are generally categorized as being shorter-term (e.g., 6 months) or longer-term (e.g., 3-5 years) in nature; however, the timeframe varies and is ultimately dependent upon the Sub-Adviser's research process.

After establishing a pool, the Sub-Adviser conducts a proprietary quantitative screening of its constituents. The Sub-Adviser considers several factors when conducting this quantitative screening process including free cash flow, yield parity, leverage, asset turnover, investment, labor intensity, valuation, relative price, momentum, and sentiment. For a stock to be included in the Fund's final portfolio it must be identified as a top-performer in two or more themes. Finally, the Sub-Adviser gives each qualifying stock an equal weighting in the final portfolio, and reallocates the portfolio to equal weight across each stock every quarter, subject to industry concentration restraints. Please see "Additional Information About the Fund" below, for information about the foregoing financial terms.

Portfolio Attributes

The Fund's portfolio will generally hold approximately 20 to 50 positions.

The number of themes represented in the Fund's portfolio will vary over time but generally will be between 5 and 10.

Under normal market circumstances, the Fund will invest at least 80% of its net assets (including any borrowings for investment purposes) in large-cap U.S. companies. The Fund considers large-cap U.S. companies to be those companies with a market capitalization of greater than \$10 billion or more. The Fund reallocates its portfolio to an equal weighting once every quarter, ensuring broad exposure across the selected stocks.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return, and/or ability to meet its investment objective. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund-Principal Risks of Investing in the Fund."

Each risk summarized below is considered a principal risk of investing in the Fund, regardless of the order in which it appears.

Economic and Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund’s portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, financial system instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. In addition, the value of the Fund’s investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. The imposition by the U.S. of tariffs on goods imported from foreign countries and reciprocal tariffs levied on U.S. goods by those countries also may lead to volatility and instability in domestic and foreign markets.

Equity Market Risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Models and Data Risk. The composition of the Fund’s portfolio is heavily dependent on investment models developed by the Sub-Adviser as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Fund’s portfolio that would have been excluded or included had the Models and Data been correct and complete. Errors in programming, data entry, system compatibility, or database integrity can result in the unintended inclusion or exclusion of securities in the Fund’s portfolio. Such errors, whether due to human or technological factors, could induce the Sub-Adviser to make investment choices that would not have been made with accurate and complete information, potentially leading to losses or missed gains for the Fund.

ETF Risks

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as Authorized Participants or APs). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Buying or selling Shares involves certain costs, including brokerage commissions, other charges imposed by brokers, and bid-ask spreads. The bid-ask spread represents the difference between the price at which an investor is willing to buy Shares and the price at which an investor is willing to sell Shares. The spread varies over time based on the Shares’ trading volume and market liquidity. The spread is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Due to the costs of buying or selling Shares, frequent trading of Shares may reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.

- *Trading.* Although Shares are listed for trading on a national securities exchange, such as NYSE Arca, Inc. (the Exchange), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares and the liquidity of the Fund's portfolio holdings may deteriorate.

Management Risk. The Fund is subject to the risk that its active management approach, including the execution of buy-and-hold investment strategies by the Sub-Adviser, may not enable it to achieve its investment objective. This risk includes the potential for underperformance or failure to meet investment goals due to the Sub-Adviser's decisions and implementation of investment strategies over time.

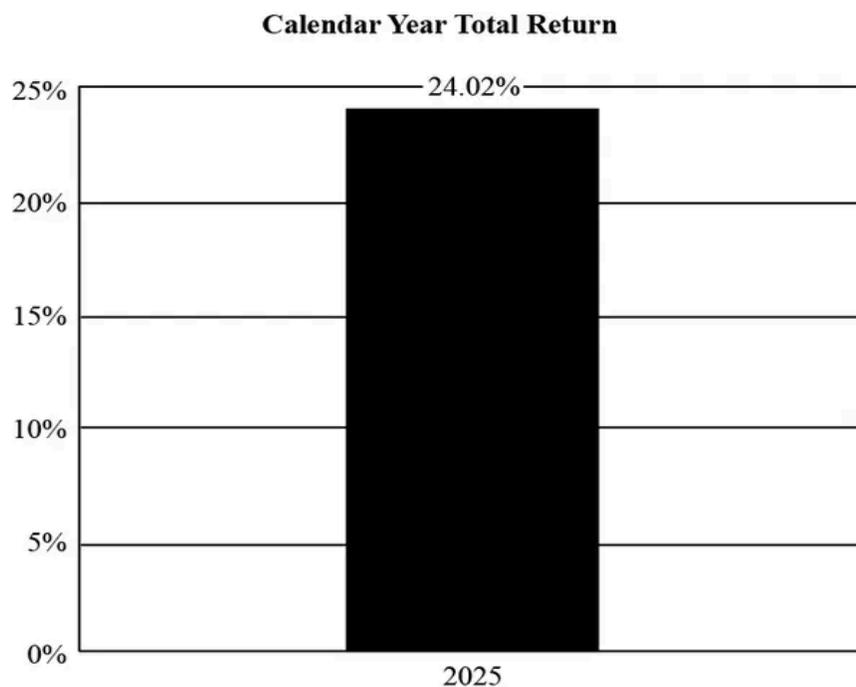

Newer Fund Risk. The Fund is a recently organized management investment company with limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decisions. There can be no assurance that the Fund will maintain an economically viable size.

Newer Sub-Adviser Risk. The Sub-Adviser is newly registered with the SEC and has limited experience with managing an exchange-traded fund regulated under the 1940 Act, which may limit the Sub-Adviser's effectiveness. As a result, there is no long-term track record against which an investor may judge the Sub-Adviser and it is possible the Sub-Adviser may not achieve the Fund's intended investment objective.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund relies on third parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund the Adviser, and Sub-Adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Performance

The following bar chart shows the Fund's annual returns. The table illustrates how the Fund's average annual returns for the 1-year and since inception periods compare with those of a broad measure of market performance. The following performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance over time. The Fund's past performance, before and after taxes, does not necessarily indicate how the Fund will perform in the future. Updated performance information is available on the Fund's website at www.grannyshots.com

During the period of time shown in the bar chart, the highest quarterly return was 24.71% for the quarter ended June 30, 2025, and the lowest quarterly return was -8.90% for the quarter ended March 31, 2025.

**Average Annual Total Returns
For the Period Ended December 31, 2025**

	1 Year	Since Inception
Return Before Taxes	24.02%	20.36%
Return After Taxes on Distributions	24.02%	20.36%
Return After Taxes on Distributions and Sale of Fund Shares	24.02%	20.36%
S&P 500 Index (reflects no deduction for fees, expenses, or taxes)	17.22%	14.80%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account ("IRA").

Management

Investment Adviser

Tidal Investments LLC (the "Adviser") serves as investment adviser to the Fund.

Investment Sub-Adviser

Fundstrat Capital, LLC (the "Sub-Adviser") serves as investment sub-adviser to the Fund.

Portfolio Managers

The following individuals are responsible for the management of the Fund's investment portfolio.

Thomas J. Lee, CFA, Portfolio Manager for the Sub-Adviser, has been a portfolio manager of the Fund since its inception in 2024.

Ken Xuan, CFA, FRM, Portfolio Manager for the Sub-Adviser, has been a portfolio manager of the Fund since its inception in 2024.

Qiao Duan, CFA, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since 2024.

Ben McCaig, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since 2024.

CFA[®] is a registered trademark owned by the CFA Institute. FRM[®] is a registered certification mark of the Global Association of Risk Professionals.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the "Deposit Securities") and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the "bid-ask spread."

Information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at www.grannyshots.com.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or some combination thereof), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser, the Sub-Adviser, or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products including the Fund or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund seeks long-term capital appreciation.

An investment objective is fundamental if it cannot be changed without the consent of the holders of a majority of the outstanding Shares. The Fund's investment objective has not been adopted as a fundamental investment policy and therefore may be changed without the consent of the Fund's shareholders upon approval by the Board of Trustees (the "Board") of Tidal Trust III (the "Trust") and 60 days' written notice to shareholders.

Principal Investment Strategies

The Fund's 80% Policy is non-fundamental and can be changed without shareholder approval upon Board approval and 60 days' written notice to shareholders prior to any such change.

Market Trends:

As noted above, the Fund's investment strategy is based on an analysis of various trends which are used to identify investment themes. These trends include the following:

- *Macro-economic trends* – refer to the broad, overarching factors that impact an economy at a national or global level. These include GDP growth, inflation rates, unemployment rates, and trade balances.
 - Example: A global recession leading to decreased consumer spending and investment.
- *Monetary policy trends* - involve the actions of central banks to manage the money supply and interest rates to achieve economic goals like controlling inflation, maintaining employment levels, and stabilizing the currency.
 - Example: The Federal Reserve increasing interest rates to combat high inflation.
- *Demographic trends* - pertain to changes in the population's structure, such as age distribution, birth rates, migration patterns, and life expectancy.
 - Example: An aging population leading to increased demand for healthcare services and retirement planning products.
- *Behavioral trends* - refer to changes in consumer behavior and preferences, influenced by cultural, social, and economic factors.
 - Example: The growing preference for online shopping over brick-and-mortar retail stores.
- *Industrial and technology trends* - encompass advancements and shifts within industries and technological innovations that drive efficiency, productivity, and new product development.
 - Example: The rise of renewable energy technologies leading to a decline in the use of fossil fuels.
- *Business cycle trends* - describe fluctuations in economic activity over time, including periods of expansion, peak, contraction, and trough.
 - Example: An economic expansion phase characterized by rising GDP, low unemployment, and increasing corporate profits.

Financial Terms:

The following provide concise definitions of the financial terms used in the Fund's principal investment strategy discussion:

- *Free Cash Flow:* The amount of cash generated by a company after accounting for capital expenditures, which is available for distribution to shareholders or reinvestment in the business.
- *Yield Parity:* The spread between a company's dividend yield and its long-term bond yield (7-10yr maturities).
- *Leverage:* The use of borrowed funds to increase the potential return on investment, which also amplifies the potential risk of loss.
- *Asset Turnover:* A financial ratio that measures the efficiency of a company's use of its assets to generate sales revenue, calculated as total sales divided by total assets.
- *Investment:* The allocation of resources, usually money, into assets or projects with the expectation of generating income or profit over time.
- *Labor Intensity:* The degree to which a business process or industry relies on human labor as opposed to capital, such as machinery and technology, for production.
- *Valuation:* The process of determining the present worth of an asset, company, or investment, often through various analytical methods.
- *Relative Price:* The measurement of the current price of a security in comparison to its high and low over the last 5 years
- *Momentum:* A market phenomenon where the price of an asset continues to move in its current direction (up or down) due to investor behavior and trends.
- *Sentiment:* The overall attitude or feeling of investors towards a particular market or asset, which can influence trading behaviors and market movements.

Correlation Analyses:

The Sub-Adviser evaluates correlation between an industry/sector to a theme both qualitatively and quantitatively. From a quantitative perspective, the Sub-Adviser uses various types of data as an indicator to quantify the correlation or relativity. For example, to evaluate the correlation of an industry to the theme "Easing Financial Conditions" the Sub-Adviser may use the price history of a particular industry, or sector, to run a correlation against major indices measuring financial conditions, such as, the National Financial Conditions Index from the Chicago Fed, the US Financial Conditions Index from Goldman Sachs, and the United States Financial Conditions Index from Bloomberg.

From a qualitative perspective, the Sub-Adviser may examine industry trends, management commentary, and broader market sentiment to assess the degree of alignment with the theme. For instance, the Sub-Adviser might review earnings calls, investor presentations, and media coverage to gauge how industry leaders are discussing financial conditions and whether they perceive an easing environment. This qualitative approach enables the Sub-Adviser to interpret how market participants and key stakeholders are reacting to, or planning for, changes in financial conditions, offering insights that quantitative data alone may not fully capture.

Principal Risks of Investing in the Fund

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your performance in the Fund:

ETF Risks

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as Authorized Participants or APs). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Buying or selling Shares involves certain costs, including brokerage commissions, other charges imposed by brokers, and bid-ask spreads. The bid-ask spread represents the difference between the price at which an investor is willing to buy Shares and the price at which an investor is willing to sell Shares. The spread varies over time based on the Shares’ trading volume and market liquidity. The spread is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Due to the costs of buying or selling Shares, frequent trading of Shares may reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed for trading on a national securities exchange, such as NYSE Arca, Inc. (the Exchange), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares and the liquidity of the Fund’s portfolio holdings may deteriorate.

Equity Market Risk. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests.

Economic and Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund’s portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, financial system instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. In addition, the value of the Fund’s investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. The imposition by the U.S. of tariffs on goods imported from foreign countries and reciprocal tariffs levied on U.S. goods by those countries also may lead to volatility and instability in domestic and foreign markets.

Management Risk. The Fund is subject to the risk that its active management approach, including the execution of buy-and-hold investment strategies by the Sub-Adviser, may not enable it to achieve its investment objective. This risk includes the potential for underperformance or failure to meet investment goals due to the Sub-Adviser’s decisions and implementation of investment strategies over time.

Market Capitalization Risk.

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Market Events Risk. The Fund’s investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities and other financial instruments. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, inflation, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities and other financial markets and adversely affect global economies and markets. Local, regional or global events such as war, military conflicts, acts of terrorism, natural disasters, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments. Continuing uncertainties regarding interest rates, rising inflation, political events, rising government debt in the U.S. and trade tensions also contribute to market volatility. Conflict, loss of life and disaster connected to ongoing armed conflict between Ukraine and Russia in Europe and between Israel and Hamas in the Middle East could have severe adverse effects on the related region, including significant adverse effects on the regional or global economies and the markets for certain securities. The U.S. and the European Union have imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. These conflicts have contributed to recent market volatility and may continue to do so.

Models and Data Risk. The composition of the Fund’s portfolio is heavily dependent on investment models developed by the Sub-Adviser as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Fund’s portfolio that would have been excluded or included had the Models and Data been correct and complete. Errors in programming, data entry, system compatibility, or database integrity can result in the unintended inclusion or exclusion of securities in the Fund’s portfolio. Such errors, whether due to human or technological factors, could induce the Sub-Adviser to make investment choices that would not have been made with accurate and complete information, potentially leading to losses or missed gains for the Fund.

Newer Fund Risk. The Fund is a recently organized management investment company with limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decisions. There can be no assurance that the Fund will maintain an economically viable size.

Newer Sub-Adviser Risk. The Sub-Adviser is newly registered with the SEC and has limited experience with managing an exchange-traded fund regulated under the 1940 Act, which may limit the Sub-Adviser’s effectiveness. As a result, there is no long-term track record against which an investor may judge the Sub-Adviser and it is possible the Sub-Adviser may not achieve the Fund’s intended investment objective.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund’s service providers, counterparties or other third parties, failed or inadequate processes and technology or systems failures. The Fund relies on third parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund’s ability to meet its investment objective. Although the Fund the Adviser, and Sub-Adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund’s daily portfolio holdings is available on the Fund’s website at www.grannyshots.com. A complete description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s Statement of Additional Information (the “SAI”).

MANAGEMENT

Investment Adviser

Tidal Investments LLC (the “Adviser” or “Tidal”), a Tidal Financial Group company, located at 234 West Florida Street, Suite 700, Milwaukee, Wisconsin 53204, is an SEC-registered investment adviser and a Delaware limited liability company. Tidal was founded in March 2012 and Tidal is dedicated to understanding, researching and managing assets within the expanding ETF universe. As of January 31, 2026, Tidal had assets under management of approximately \$50.52 billion and served as the investment adviser or sub-adviser for 343 registered funds.

Tidal serves as investment adviser to the Fund and has overall responsibility for the general management and administration of the Fund pursuant to an investment advisory agreement with the Trust, on behalf of the Fund (the “Advisory Agreement”). The Adviser is responsible for trading portfolio securities and financial instruments for the Fund, including selecting broker-dealers to execute purchase and sale transactions. The Adviser provides oversight of the Sub-Adviser and review of its performance. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Fund to operate. For the services it provides to the Fund, the Fund pays the Adviser a unitary management fee, which is calculated daily and paid monthly, at an annual rate of 0.75% of the Fund’s average daily net assets.

Under the Advisory Agreement, in exchange for a single unitary management fee from the Fund, the Adviser has agreed to pay all expenses incurred by the Fund except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, litigation expenses, other non-routine or extraordinary expense (collectively, the “Excluded Expenses”), and the unitary management fee payable to the Adviser.

Investment Sub-Adviser

Fundstrat Capital, LLC (“Sub-Adviser”), a Delaware limited liability company, located at 150 East 52nd Street, New York, NY 10022 serves as the investment sub-adviser for the Fund. The Sub-Adviser was founded in July 2024 and became an SEC-registered investment adviser in 2024. As of January 31, 2026, the Sub-Adviser had assets under management of approximately \$4,695 million.

The Sub-Adviser is responsible for the day-to-day management of the Fund’s portfolio, including determining the securities and financial instruments purchased and sold by the Fund, subject to the supervision of the Adviser and the Board. The Sub-Adviser serves as the sub-adviser to the Fund, pursuant to a sub-advisory agreement between the Adviser and the Sub-Adviser (the “Sub-Advisory Agreement”).

For its services as sub-adviser, the Sub-Adviser is entitled to receive a fee from the Adviser, which fee is calculated daily and payable monthly, at an annual rate of 0.04% of the average daily net assets of the Fund. However, as Fund Sponsor, the Sub-Adviser may automatically waive all or a portion of its sub-advisory fee. See “Fund Sponsor” below for more information.

Advisory and Sub-Advisory Agreements

A discussion regarding the basis for the Board’s approval of the Fund’s Advisory Agreement and Sub-Advisory Agreement will be available in the Fund’s semi-annual filing on Form N-CSR for the period ending April 30, 2025.

Portfolio Managers

The following individuals (each, a Portfolio Manager) have served as portfolio managers of the Fund since its inception in 2024. Messrs. Lee and Xuan are jointly and primarily responsible for the day-to-day management of the Fund’s securities investments. Ms. Duan and Mr. McCaig oversee trading and execution for the Funds.

Thomas J. Lee, CFA, Chief Investment Officer and Portfolio Manager for the Sub-Adviser (NYSE: GRNY, GRNJ, GRNI)

Bitmine Immersion (NYSE: BMNR): Chairman of the Board

Thomas J. Lee (Tom Lee) is one of the most widely recognized and followed macro strategists on Wall Street, with nearly 30 years of experience in macro strategy and equity research. Known for his evidence-based, data-driven approach, he has made numerous timely and contrarian market calls—often going against consensus with accuracy—and was one of the first strategists to introduce institutional investors to Bitcoin. He is widely regarded as a trusted voice among top asset managers, advisors, and allocators.

In September 2014, he co-founded Fundstrat Global Advisors and is the Head of Research. Fundstrat Global Advisors is an independent investment research and market strategy firm known of lending top-down macroeconomic analysis with bottom-up fundamental research. Fundstrat Global Advisors has more than 30 full-time employees and serves hedge funds, mutual funds, and family offices in more than 26 countries.

Tom Lee founded Fundstrat Capital, the Sub-Adviser, in Spring 2024 and serves as its Chief Investment Officer while continuing in his role as Head of Research at Fundstrat. He is the lead Portfolio Manager for the Fundstrat Granny Shots ETF suite (NYSE: GRNY, GRNJ, GRNI). The flagship large-cap portfolio, GRNY, is recognized as one of the most successful equity ETF launches of the past two decades, with over \$4.6 billion in assets under management as of January 31, 2026.

In June 2025, Lee was appointed Chairman of the Board of Bitmine Immersion Technologies (NYSE American: BMNR). He serves this role while also maintaining his roles as Head of Research at Fundstrat and CIO of Fundstrat Capital. At Bitmine, a \$9 billion market-cap company, he plays a role in guiding the company's strategic pivot toward an Ethereum-focused treasury model and broader blockchain initiatives.

Before founding Fundstrat, Lee was Chief Equity Strategist at J.P. Morgan Chase & Co., where he worked from 1999 through 2014. Earlier in his career, he was a highly regarded telecommunications equity research analyst and small-cap equity/bankruptcy/reorg strategist, holding roles at firms including Kidder, Peabody and Salomon Smith Barney.

Over the course of his career, he has been ranked consistently by *Institutional Investor* for the past 30 years, earning #1, #2, and #3 positions for 15 consecutive years from 1998 to 2013. He is known for his data-driven approach ("analysis not opinions"), and clients view his work as both contrarian and highly differentiated.

Lee earned a BSE in Economics from the University of Pennsylvania's Wharton School, with dual concentrations in Finance and Accounting. He is also a CFA Charter holder.

Ken Xuan, CFA, FRM, Portfolio Manager for the Sub-Adviser

Ken Xuan is a Portfolio Manager at Fundstrat Capital and Head of Data Science at Fundstrat Global Advisors, where he maintains and optimizes the firm's proprietary portfolio and quantitative models used for portfolio construction and stock selection.

He is also responsible for all data-related tasks, including identifying relevant alternative data sources, maintaining and updating the database, and automating reports.

Before joining Fundstrat Global Advisors in 2017, he worked at West Monroe Partners and Chinese EV manufacturer BYD Motors Inc. Ken holds B.S. degrees in Management and Economics from Purdue University and an M.S. degree in Operations Research from Columbia University. He is a CFA® charter holder and an FRM-Certified Professional.

Qiao Duan, CFA, Portfolio Manager for the Adviser

Ms. Qiao Duan serves as Portfolio Manager at the Adviser, having joined the firm in October 2020. From February 2017 to October 2020, she was an execution Portfolio Manager at Exponential ETFs, where she managed research and analysis relating to all Exponential ETF strategies. Ms. Duan previously served as a portfolio manager for the Exponential ETFs from their inception in May 2019 until October 2020. Ms. Duan received a Master of Science in Quantitative Finance and Risk Management from the University of Michigan in 2016 and a Bachelor of Science in Mathematics and Applied Mathematics from Xiamen University in 2014. She holds the CFA designation.

Ben McCaig, Portfolio Manager for the Adviser

Mr. McCaig serves as Portfolio Manager of the Adviser, having joined the Adviser in August 2021. Mr. McCaig previously served as a portfolio manager, compliance, and operations manager at the Ohio Treasurer's Office from July 2017 to August 2021. Previously, Mr. McCaig was Senior Equity Trader for the trust department at Huntington National Bank. Mr. McCaig attended Bowling Green State University where he received a Bachelor of Science in Business Administration with a specialization in Finance.

CFA® is a registered trademark owned by the CFA Institute. FRM® is a registered certification mark of the Global Association of Risk Professionals.

The Fund's SAI provides additional information about each Portfolio Manager's compensation structure, other accounts that each Portfolio Manager manages, and each Portfolio Manager's ownership of Shares.

Fund Sponsor

The Adviser has entered into a fund sponsorship agreement with the Sub-Adviser pursuant to which the Sub-Adviser is a sponsor to the Fund. Under this arrangement, the Sub-Adviser has agreed to provide financial support (as described below) to the Fund. Every month, unitary management fees for the Fund are calculated and paid to the Adviser, and the Adviser retains a portion of the unitary management fees from the Fund.

In return for its financial support for the Fund, the Adviser has agreed to pay the Sub-Adviser any remaining profits generated by unitary management fee the Fund. If the amount of the unitary management fees for the Fund exceeds the Fund's operating expenses (including the sub-advisory fee) and the Adviser-retained amount, that excess amount is considered "remaining profit." In that case, the Adviser will pay the remaining profits to the Sub-Adviser.

During months when the funds generated by the unitary management fee are insufficient to cover the entire sub-advisory fee, those fees are automatically waived (and any such waived fees are not subject to recoupment). Further, if the amount of the unitary management fee for the Fund is less than the Fund's operating expenses and the Adviser-retained amount, the Sub-Adviser is obligated to reimburse the Adviser for the shortfall.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or "street name" through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with the NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security or other asset held by the Fund or is determined to be unreliable, the security or other asset will be valued at fair value estimates under guidelines established by the Adviser (as described below).

Fair Value Pricing

The Board has designated the Adviser as the “valuation designee” for the Fund under Rule 2a-5 of the 1940 Act, subject to its oversight. The Adviser has adopted procedures and methodologies, which have been approved by the Board, to fair value Fund investments whose market prices are not “readily available” or are deemed to be unreliable. For example, such circumstances may arise when: (i) an investment has been delisted or has had its trading halted or suspended; (ii) an investment’s primary pricing source is unable or unwilling to provide a price; (iii) an investment’s primary trading market is closed during regular market hours; or (iv) an investment’s value is materially affected by events occurring after the close of the investment’s primary trading market. Generally, when fair valuing an investment, the Adviser will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer’s business, recent trades or offers of the investment, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the investment. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Adviser adopted valuation procedures. The Adviser will fair value Fund investments whose market prices are not “readily available” or are deemed to be unreliable. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser will be able to obtain the fair value assigned to the investment upon the sale of such investment.

Investments by Other Registered Investment Companies in the Fund

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions of rules under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

Delivery of Shareholder Documents – Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends and interest income, if any, quarterly, and distribute any net realized capital gains to its shareholders at least annually. The Fund will declare and pay income and capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (a “RIC”) under the Internal Revenue Code of 1986, as amended (the “Code”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund-level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this Prospectus. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains to shareholders. Distributions of short-term capital gain will generally be taxable to shareholders as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a Net Investment Income ("NII") tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund's distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable to you even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act ("FATCA"), the Fund may be required to withhold a generally nonrefundable 30% tax on distributions of net investment income paid to (A) certain foreign financial institutions unless such foreign financial institution agrees to verify, monitor, and report to the Internal Revenue Service (IRS) the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution's country of residence), and (B) certain non-financial foreign entities unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. This FATCA withholding tax could also affect the Fund's return on its investments in foreign securities or affect a shareholder's return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

Taxes When Shares are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of substantially identical Shares.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Important Tax Considerations When Purchasing Fund Shares

If you are investing through a taxable account, you should carefully consider the timing of your investment relative to the relevant Fund's distribution schedule. Purchasing Fund shares shortly before a distribution may increase your tax liability, a situation commonly referred to as "buying a dividend."

When a Fund makes a distribution, its share price typically drops by an amount roughly equal to the distribution. As a hypothetical example, if you invest \$5,000 to purchase 250 shares at \$20 per share on December 15, and the Fund pays a \$1 per share distribution on December 16, the share price would adjust to \$19 (ignoring market fluctuations). Although your total investment value remains \$5,000 (250 shares × \$19 in share value plus 250 shares × \$1 distribution), you would owe taxes on the \$250 distribution, even if you reinvest the distribution rather than receiving it in cash.

Distributions are taxable to shareholders even if they are paid from income or gains realized by a Fund before you invested, and even if they were reflected in the purchase price of the shares. Consequently, you may incur taxes on income or gains that accrued before your investment, without corresponding benefit.

Unless you are investing through a tax-advantaged account, such as an IRA or an employer-sponsored retirement plan, you may wish to avoid purchasing Fund shares shortly before a distribution. You can minimize the potential tax impact by reviewing a Fund's distribution schedule prior to investing. When available, information about each Fund's distribution schedule can be found on the Fund's website at www.grannyshots.com.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state, and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAL.

DISTRIBUTION

Foreside Fund Services, LLC, a wholly owned subsidiary of Foreside Financial Group (dba ACA Group) (the “Distributor”), the Fund’s distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor’s principal address is 190 Middle Street, Suite 301, Portland, Maine 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to pay distribution fees for the sale and distribution of its Shares.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of a Fund can be found on the Fund’s website at www.grannyshots.com.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to the owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Adviser, and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

The Third Amended and Restated Agreement and Declaration of Trust (“Declaration of Trust”) provides a detailed process for the bringing of derivative or direct actions by shareholders in order to permit legitimate inquiries and claims while avoiding the time, expense, distraction, and other harm that can be caused to the Fund or its shareholders as a result of spurious shareholder demands and derivative actions. Prior to bringing a derivative action, a demand by three unrelated shareholders must first be made on the Fund’s Trustees. The Declaration of Trust details various information, certifications, undertakings and acknowledgments that must be included in the demand. Following receipt of the demand, the trustees have a period of 90 days, which may be extended by an additional 60 days, to consider the demand. If a majority of the Trustees who are considered independent for the purposes of considering the demand determine that maintaining the suit would not be in the best interests of the Fund, the Trustees are required to reject the demand and the complaining shareholders may not proceed with the derivative action unless the shareholders are able to sustain the burden of proof to a court that the decision of the Trustees not to pursue the requested action was not a good faith exercise of their business judgment on behalf of the Fund. The Declaration of Trust further provides that shareholders owning Shares representing no less than a majority of the Fund’s outstanding shares must join in bringing the derivative action. If a demand is rejected, the complaining shareholders will be responsible for the costs and expenses (including attorneys’ fees) incurred by the Fund in connection with the consideration of the demand, if a court determines that the demand was made without reasonable cause or for an improper purpose. If a derivative action is brought in violation of the Declaration of Trust, the shareholders bringing the action may be responsible for the Fund’s costs, including attorneys’ fees, if a court determines that the action was brought without reasonable cause or for an improper purpose. The Declaration of Trust provides that no shareholder may bring a direct action claiming injury as a shareholder of the Trust, or any Fund, where the matters alleged (if true) would give rise to a claim by the Trust or by the Trust on behalf of the Fund, unless the shareholder has suffered an injury distinct from that suffered by the shareholders of the Trust, or the Fund, generally. Under the Declaration of Trust, a shareholder bringing a direct claim must be a shareholder of the Fund with respect to which the direct action is brought at the time of the injury complained of or have acquired the shares afterwards by operation of law from a person who was a shareholder at that time. The Declaration of Trust further provides that the Fund shall be responsible for payment of attorneys’ fees and legal expenses incurred by a complaining shareholder only if required by law, and any attorneys’ fees that the Fund is obligated to pay shall be calculated using reasonable hourly rates. These provisions do not apply to claims brought under the federal securities laws.

The Declaration of Trust also requires that actions by shareholders against the Fund be brought exclusively in a federal or state court located within the State of Delaware. This provision will not apply to claims brought under the federal securities laws. Limiting shareholders' ability to bring actions only in courts located in Delaware may cause shareholders economic hardship to litigate the action in those courts, including paying for travel expenses of witnesses and counsel, requiring retaining local counsel, and may limit shareholders' ability to bring a claim in a judicial forum that shareholders find favorable for disputes, which may discourage such actions.

FINANCIAL HIGHLIGHTS

The Financial Highlights table is intended to help you understand the Fund's financial performance for the Fund's periods shown. Certain information reflects financial results for a single Fund share. The total return in the table represents the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Tait, Weller & Baker LLP, the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's Annual Certified Shareholder Report, which is available upon request.
